Re: Position Statements

Since its founding in 1971, the Concrete Floor Contractors Association has represented the concrete finishing industry in all matters relating to our trade including standards development and specifier support. Our role is to continuously improve the quality of our services to serve your clients better.

There are many factors that contribute to problems in concrete floors which affect owners, specifiers, contractors and materials suppliers. CFCA Position statements are designed to improve quality by clarifying responsibilities and thereby reduce problems.

If you have any questions, or concerns, please call or e-mail us.
